Amendments to the Specification:

Please replace the paragraph beginning on page 15, line 10, with the following rewritten paragraph:

--Generally, the second listener listens for events on all children browsers as well as the top web browser. The aims of the second listener is~~is~~ are to identify that a new page is ready to be parsed, and to cancel an ongoing parsing if content is disregarded (e.g., a Web page is destroyed.) Part of the second listener's responsibilities is, ~~to~~ upon the detection of a refresh, to attach ~~a~~ an On Unload event on the page. This event helps to identify refreshes so ~~to~~ that content parsing may be controlled accordingly.--
